From premium cooking and cabinetry options to luxury dining and lounging

NEWAGE SERVICES

Why Buy From Newage Products

We manufacture and sell only the best quality products, and treat every customer interaction as an opportunity to build a great relationship.

Proven Durability

From stress-testing to durability testing in the harshest of winters, our goal is simple; build products that outlast and outperform anything else out there.

A One-Stop Outdoor Destination

Look no further. A complete outdoor solution, with furniture, cabinets, grills, countertops and appliances that complement each other and are engineered to work together seamlessly.

Pre-Assembled Cabinetry

Our modular cabinet systems are easy to install, and compatible with standard-sized appliances.

Exclusive Sales Assistance

Our product experts guide you through the purchasing process, and provide product recommendations based on how you envision your space.

We Design, Engineer, & Sell Our Own Products

No private-labels. No rebranding inferior products. When we say we sell our own products, it means that from order, to factory, to shipping to your home, you are dealing with NewAge Products and no one else.

HOW TO SHOP

We Make Creating The Perfect Set Easy

Whether you're a home improvement professional or homeowner, dealing with NewAge means you can enjoy perks that make the entire process smooth and easy – from free personalized design assistance and exclusive discounts to convenient delivery options.

Shop Individual Components

Our modular design lets you select from cabinets, appliances and furniture for a fully customizable outdoor space, built specifically to your needs.

Expertly Pre-Configured Sets

Choose from popular product configurations that are easy to order and make any backyard a more beautiful and functional space.

Signature Series

How our components come together seamlessly

Engineered for quick assembly, our precision-fit fiber cement boards attach to the steel frames as a solid backing for your finishing stone. Natural Stacked Stone is secured to the fiber cement board with mortar, forming a weather tight finish that is both beautiful and durable.

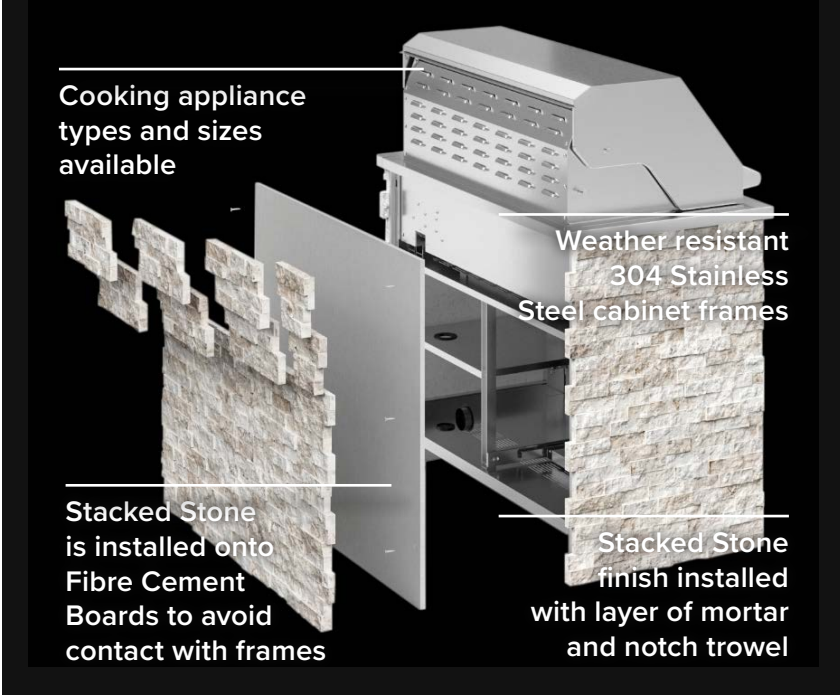

Finish your set by adding Natural Stacked Stone panels for a premium finish.

Our Natural Stacked Stone Panels come in various options for any style, from refined rustic to contemporary chic.

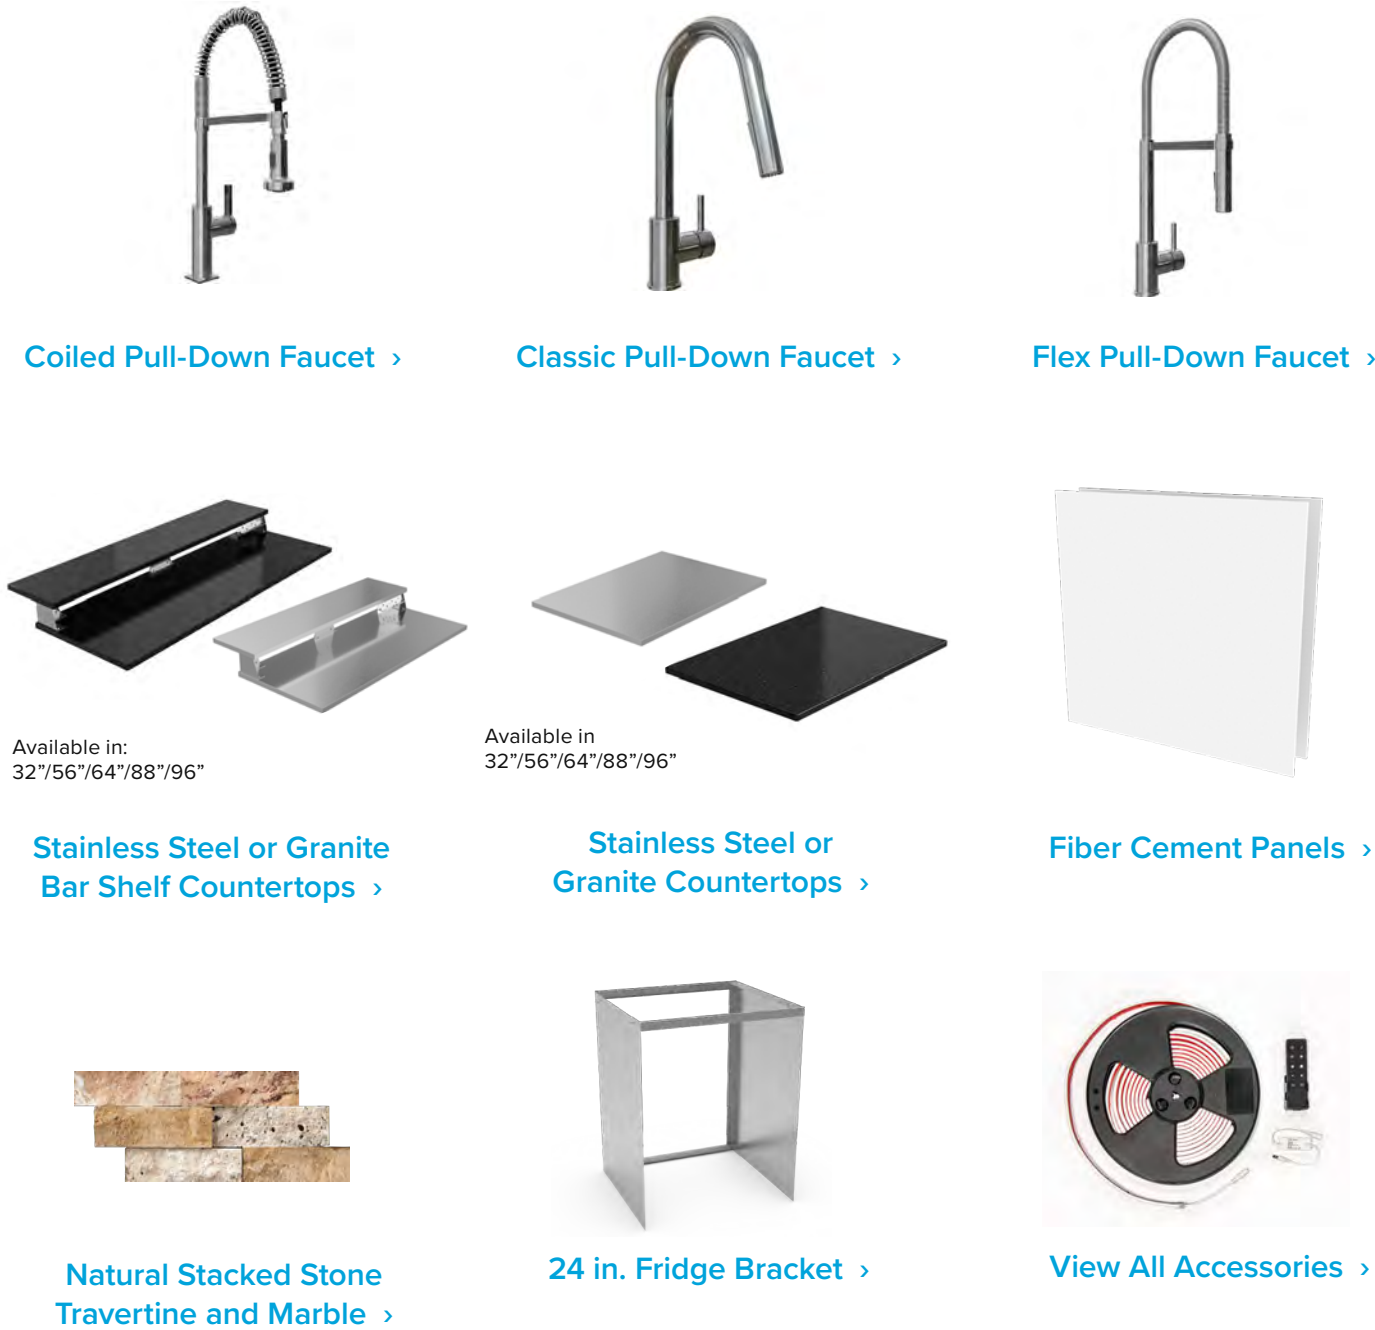

High Quality Countertop Options

Complete your Outdoor Kitchen with the beauty and strength of granite or stainless steel countertops.

Premium Features

Powder-Coated Aluminum Tube Frames

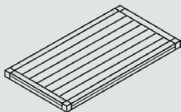

Corrosion, Rust, UV Resistant

Removable Panels & Door Fronts

Height-Adjustable Shelves and Racks

WPC Shelving With Aluminum Framing

Built-In Module Ready: Grill, Sink, Side Burner

Height-Adjustable Levelling Legs

Reversible Parts For Easy Assembly

5-Year Limited Warranty Protection

Pre-Configured Cabinet Sets

Complete sets built around the pairings that work. Cabinetry, grill and top modules seamlessly matched and ready for any backyard cookout.

Modular Configurations

Build the outdoor kitchen your space allows. Anchor the center of the set with the 30 in. cabinet, then extend in 28.5 in. and 15 in. increments — grills, sinks, side burners, drawers and countertops in any order.

Versatile Door Panels

Panels and doors remove without tools. Either display your items or conceal them as the space evolves. Open shelving one season, closed storage the next.

Not a DIY Expert? No problem.

Reversible parts and a simplified U-frame structure — fewer components, no orientation errors, faster from carton to configured.

Engineered For The Elements

1.5 in. powder-coated aluminum tube frames resist corrosion, rust and UV. WPC shelving with aluminum framing carries up to 150 lbs per cabinet, and is outdoor-rated through every season.

The Essential Grill

304 and 430 stainless steel construction, four U-shaped burners to 32,000 BTUs, 6mm stainless grates, manual piezo ignition. 453 sq. in. main cooking area plus a 118 sq. in. elevated warming rack. Flame tamers and heat shield channel grease to an integrated tray.

Platinum Griddle

[LEARN MORE >](#)

Limited Lifetime Warranty

[Detailed information on the Installation Guide >](#)

Built To Endure. Designed To Impress.

Crafted from 304 stainless steel, the body construction offers exceptional resistance to rust, corrosion, and weathering—ensuring long-lasting durability in all seasons to withstand the elements in your backyard.

Precision Heat Control At Every Turn

Equipped with dual H-shaped 16,000 BTU burners (32,000 BTUs in total), our griddle reaches up to 600°F, delivering fast, even heat across the entire surface for precise, consistent cooking every time.

Dual-Zone Power for Precision Cooking

With 441 sq.in of 9mm thick steel and two H-shaped burners creating independent heat zones, the cooking surface delivers superior heat retention and even distribution for precise, restaurant-quality grilling.

Smash, Sear, and Savor

Featuring a flat smooth surface and a ribbed zone, the griddle offers versatile smash-and-sear options. Channeling fats for healthier cooking, providing flavourful sear marks, all while delivering even heat for faster and flavor-packed results.

Sunproof® By Design

Sunproof® fabric for our Umbrella canopies, for extreme protection against the elements. Sewn from Solution dyed olefin, Sunproof fabric withstands prolonged exposure to direct sunlight, blocking more than 97% of harmful UV rays, and is specially treated to reduce fabric absorption of stains, keeping your umbrella looking clean and beautiful.

Water-Repelling And Fade-Resistant

Thick Sunproof fabric canopy is supported by teak wood ribs and smoothly opens and closes using a durable stainless steel pully lift system. Choose from a 304 Stainless Steel or premium Teak post. Heavy powder-coated steel stands keep your umbrella locked in place

Invest Where It Matters

[READ OUTDOOR FURNITURE MATERIAL GUIDE >](#)

Our furniture materials are carefully selected for their resilience in outdoor applications, and extensively tested to ensure they stand up to many years of use.

Let’s Talk Teak

We only use Grade A teak to ensure a consistent grain with minimal aesthetic variations. Your furniture can be treated regularly to retain its original color or allowed to age gracefully and take on a beautiful silver-gray tone.

Knot Your Average Woven Rope

Our woven rope furniture is highly resistant to all types of weather, including heavy winds and rain. The woven material contains polypropylene which has excellent UV resistance, preventing color-fading, and high resistant to absorbing water, so there’s no need to worry about mold or mildew.

The Power of Powder-Coated Aluminum

Our powder coating technique protects our furniture frames with a durable layer of beautiful color that’s electrostatically charged to adhere securely and baked on for smooth, long-lasting protection. Integrated microbeads add even more depth to the color, creating a rich, lustrous look you’ll enjoy for years.

All Steel Is Not Created Equal

Our 304 grade Stainless Steel contains high levels of nickel and chromium in its composition, for an ultra-strong, yet lightweight frame material that’s corrosion resistant.

How To Measure Your Space

Referring to the diagram below, take length and width measurements of your Outdoor space.
Don't forget to mark any unusable areas.

How To Measure Your Outdoor Kitchen For New Cabinets

Linear and Gallery layout:

Horizontal Measurement:

1. Measure the width from left to right of the wall or available space.
2. Mark exact location of water, drain, gas lines, electrical outlets, and switches on drawing.
3. Measure what is the depth (front to back) available for the cabinets.
4. Please check if the wall is combustible or not. If combustible the appliances must be at least 18” away from the wall. If not then leave a gap of 4”.

Vertical Measurement:

1. If the cabinets are going along a wall, please share the height of the wall.
2. If there are obstruction on
3. the wall, please share its dimensions and its measurement from the left and right of the wall and height from the floor.

L-Shape and Wrapped around layout:

Horizontal Measurement:

1. Measure the width from the corners to both the sides of the walls or available space.
2. Mark the space for the appliances, such as grill, dual side burner, kamado, under-counter refrigerator, generator, ice maker if applicable.
3. Dividing the L or U shaped kitchen in cooking and prepping zones will help organize the kitchen and help with the functionality of it.

Vertical Measurement:

1. If the cabinets are going along a wall, please share the height of the wall.
2. If there are obstruction on the wall, please share its dimensions and its measurement from the left and right of the wall and height from the floor.
3. If the cabinets are in middle of the outdoor space, the tentative dimension of the space to be used with the cabinets will help.

*Note: Ensure you have a sturdy surface to install the cabinets

Product Testing & Results: Outdoor Kitchen Cabinetry

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Cabinets Signature and Classic			
Distributed Load Test	To ensure that cabinet and its internal components wont fail when loaded with distributed load at claimed load capacity	Evenly distribute weight on Cabinet and measure the deflection of loaded surface and observe any permanent deformations	Passed test
Fully Assembled Cabinets Packaging Test	Packaging test as per ISTA 3A & 3B transit test for LTL shipment.	Product and packaging should not damage during Transportation study.	Passed test
Cabinets Signature ONLY			
Cabinet Tip Over Test	1. No tip overs when the drawer (empty) are fully extended. 2. No tip overs when the drawer (empty) are fully extended and up to 50 lb force is applied on the edge of the drawer. 3. No tip overs when the drawers are in fully extended position and are loaded with Claimed load capacity.	To ensure tip over resistance for 50lb force after fully extending draws on cabinet.	Passed test
Cabinet Drawers Pull Force Test	Pull all drawers, one at a time, using a force gauge and record the pulling force required to fully open each drawer.	To ensure less that 15lb pulling force for better ergonomic and comfort.	Passed test
Cabinet Drawers Drawer Slide Test	Durability Test (‘Slide durability test ANSI/KCMA A161.1-2012 (Refer to Section 7.1.2)	To ensure drawer durability and supports ANSI/KCMA A161.1-2012 (Refer to Section 7.1.2)	Passed test
Cabinet Hinges	No Loss of serve-ability up to 25,000 cycles for door.	To ensure door hinges durability and supports ANSI/KCMA A161.1-2013 (Refer to 6.2.2 section C)	Passed test
RTA Cabinets Packaging Test	ISTA 3B Package Test for LTL Shipment	To ensure robustness in packaging as per ISTA 3A Transit Test Standard for Parcel Shipment	Passed test
Faucets Signature and Classic Outdoor Kitchen			
Plumbing Standards for Canada and US	cUPC Certification - ASME A112.18.1 Standard	Meets Plumbing Standards for Canada and US per ASME A112.18.1 test standard	Certified
NSF61 Certified	NSF61 Safety Standard Test	Meets Drinking Water System Components safety standards for Canada and US per NSF/ANSI 61 Standard	Compliant

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Faucets Signature and Classic Outdoor Kitchen			
NSF372 Certified	NSF/ANSI 61 Standard	Meets Lead-Free Standard for Kitchen Faucet for Canada and US per NSF372 Standard	Compliant
California CEC Compliant	California CEC Compliant	Meets Flow Rate Requirements as per California Appliance Efficiency Regulations. - Water flow rate must be <1.8 gpm @ 60 psi, tested in accordance with 10 C.F.R. Section 430.23(s) (Appendix S to Subpart B of part 430)	CEC Registered
US Department of Energy Flow Rate Test	Flow Rate Requirements as per US Department of Energy with reference to 10 CFR Part 430 (Energy or Water Conservation Program for Consumer Products) and the the Energy Policy and Conservation Act.	Meets Flow Rate Requirements as per US Department of Energy. - Water flow rate Must be <2.2 gpm @ 60 psi, tested in accordance with 10 CFR Part 430 (Energy or Water Conservation Program for Consumer Products) and the Energy Policy and Conservation Act	DOE Registered
Farmhouse Sinks 18in and 36in for Signature Cabinet and 32in Sink for Classic Cabinet			
Plumbing Standards for Canada and US	cUPc Certified Sink	Meets Plumbing Standards for Canada and US per ASME A112.19.3 test standard	Compliant
Countertops Stainless Steel Countertops			
NSF/ANSI 2 - Food Equipment	NSF Certified	NSF Certified per NSF/ANSI 2. Food Equipment Standard. Do not leach harmful chemicals into food. Cleanable and not likely to harbor bacteria	Certified
LED Driver Power Adaptor for LED Strip, Signature Outdoor Kitchen Only			
Certificate of Compliances	cULus Certified (under supplier's name) - for Outdoor Use	Meets electrical product safety certification requirements per UL and CSA standards, cULus certified under supplier name. Input: 100-240V, 50/60Hz, 1.3A. Output: 24V, 2500mA, 60W. Suitable for wet, damp and dry location	Compliant
Certificate of Compliances	FCC certified	Certifies that the electromagnetic interference from the device is under limits approved by the FCC (Federal Communications Commission.)	Certified

Product Testing & Results: Covers, Cement Fiber Boards, Tops

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
900DTPU Fabric of the Covers Signature and Classic			
Water-resistance Test	AATCC 35	To ensure Water Resistance as per AATCC 35 - Conduct test for 5-minutes @ 3-feet. Maximum 1 gram water penetration	Passed Test
Water Repellency Test	AATCC 22	To ensure Water Repellency as Per AATCC 22 - 90 Rating	Passed Test
Colorfastness to Water Test	AATCC 107	To meet Class 3.0 Requirement	Passed Test
Colorfastness to Light Test	AATCC 16	Outdoor Use Fabric shall have Class 3.0 rating @100 Hours CF to light test.	Passed Test
Colorfastness to Crocking Test	AATCC 8	Min. Class 4.0 (Dry); Class 3.0 (Wet)	Passed Test
Effect of Extreme Temperature and Humidity Test	Test Condition - 24 Hours at -32° F and 24 Hours at 95% RH and 100 °F	Evaluation of physical changes (Dimensional, Color and other damages)	Passed Test
Fibre Cement Panels (Signature Series only)			
Salt Spray Test	ASTM B117 - Spray 5% salt solution on fiber cement panel for 48 hrs and observe any corrosion	There shall be no visual change	Passed Test
Combustion material testing	Test as per ASTM E136-2016	There should be no flaming during the time of test and other specific criteria regarding about weight loss and temperature rise are met	Pass as Non-Combustible Material
Packaging Performance Transit Test	ISTA 3B transit test for parcel shipment	No Damage on product after testing	Passed Test
Granite Top			
Packaging Performance Transit Test	ISTA 3B transit test for LTL	No damages on product after testing	Passed Test
Hot/Cold Extreme Temperature Test	Test Condition- 24 Hours at -30°C and 24 Hours at 50°C	No damages on product after testing	Passed Test

Product Testing & Results: Outdoor Furniture

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Outdoor Furniture Chaise Lounger			
Seat & back static load Seat & leg rest static load Seat & back durability Additional seat durability Durability on backrest mechanism Impact Lifting Stability	EN 581-2 Mechanical safety requirements and test methods of outdoor seating for camping, domestic and contract use for adults’ furniture.	1. No fracture of any joint, member, component 2. No loosening of joints intended to be rigid 3. Shall fulfill its function after removal of load 4. Shall meet safety requirements	Passed test
Outdoor Furniture Sofa, 1/2/3/4/5-Seater, Dining Chair			
Seat front edge Static Load Seat & Back durability Armrest Static Load Armrest Durability Leg Forward Static Load Leg Sideway Static Load Seat Impact Stability (Single Sofa)	EN 581-2 Mechanical safety requirements and test methods of outdoor, seating for camping, domestic and contract use for adults’ furniture.	1. No fracture of any joint, member, Component 2. No loosening of joints intended to be rigid 3. Shall fulfill its function after removal of load 4. Shall meet safety requirements	Passed test
Outdoor Furniture Bench, Side Table, Coffee Table, Ottoman			
Seat Static Load Seat front edge Static Load Seat Durability Leg Forward Static Load Leg Sideway Static Load Seat Impact Stability	EN 581-2 Mechanical safety requirements and test methods of outdoor seating for camping, domestic and contract use for adults’ furniture.	1. No fracture of any joint, member, Component 2. No loosening of joints intended to be rigid 3. Shall fulfill its function after removal of load 4. Shall meet safety requirements	Passed test
Outdoor Furniture Dining Table			
Vertical Static Load Additional vertical Static load Horizontal Durability Stability	EN 581-2 Mechanical safety requirements and test methods of outdoor seating for camping, domestic and contract use for adults’ furniture.	1. No fracture of any joint, member, Component 2. No loosening of joints intended to be rigid 3. Shall fulfill its function after removal of load 4. Shall meet safety requirements	Passed test

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Outdoor Furniture Components with surface coating			
Lead, Cadmium, phthalates content	CAL Prop65	Lead< 90ppm, Cadmium<300ppm. Phthalates<1000ppm	Passed test
Outdoor Furniture Fabric of Umbrellas (Sunproof®)			
Seam Slippage	ISO 13936-2	60 N Warp & Weft	Claim per Technical Data Sheet
Tear Strength	ISO 13937-1	65 N Warp & 40N Weft	
Tensile Strength	ISO 13934-1	1000N Warp & 1030N Weft	
Color Fastness to artificial	ISO 105:B04	7-8	
Weathering			
Hydrostatic pressure test	AATCC 127 measures the resistance of a fabric to the penetration of water under hydrostatic pressure	863 mm/bar	
UV light Exposure	UV Standard 801	Comply with the UV 801 requirement	
Weatherability	ASTM G53-96	No any visual change till 1500 Hrs.	
Law Label for Cushion/Pillow (Compliance and Certification)			
Various states of USA Law and IABFLO requirement for upholstery furniture	US Law Label format per IABFLO labelling requirement	As specified per IABFLO labelling requirement	Compliant
Flammability Label for Cushion/Pillow (Compliance and Certification)			
California Technical Bulletin (TB-117) for Flammability and labelling	Testing and labelling requirements per TB-117	As specified per TB-117	Compliant
VLK Certificate of Timber Legality Assurance System (Compliance and Certification)			
US Lacy Act	US Lacey Act Requirements (16 U.S.C. 3372(f))	Compliance with US Lacey Act Requirements (16 U.S.C. 3372(f)) for Outdoor Furniture that contains teak wood, and Timber Legality Assurance System as stipulated in SK./62/PHPL/SET.5/ KUM.1/12/2020	Compliant
GreenGuard Certificate for Low Chemical Emissions for Sunbrella® Acrylic Fabric for Cushion/Pillow			
GreenGuard Certification	UL 2818 - 2013 Gold Standard for Chemical Emissions for Building Materials, Finishes and Furnishings	Comply with the requirements of UL 2818 -2013 Gold Standard for Chemical Emissions for Building Materials, Finishes and Furnishings	Certified

Product Testing & Results: Outdoor Furniture

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Outdoor Furniture Fabric of Cushion/Pillow (100% Sunbrella ®Acrylic)			
Seam Slippage	ASTM D 4034 Resistance to Yarn Slippage	60 lbs Warp & filling	Claim per Technical Data Sheet
Tear Strength	ASTM D 2261 measurement of the tearing strength of textile fabrics	15 lbs for Wrap & 14 lbs for filling	
Break Strength	ASTM D5034 TO determining the breaking strength and elongation of fabric	180 lbs Warp & 160 lbs Filing	
Color Fastness to Crocking	AATCC 8 To determine the amount of color transferred from the surface of colored textile materials to other surfaces by rubbing	Grade 5 Wet Grade 5 Dry	
Color Fastness to light	AATCC 169 Option 3 & SAE J 1960/J2527 measure the resistance to water of dyed, printed and colored textile yarns and fabrics	Grade 4@2200kJ per AATCC 169 Opt 3 Grade 4/5 @1500 kJ per SAE 1960/J2527	
Abrasion	ASTM D4157,ASTM D4966 To measures a textile's ability to withstand abrasion	There should not any fabric rapture after 16000 cycle	
Bow and skew	ASTM D3882To measurement of distortion of filling yarns	0.5 Inches	
Width, Construction and Weight	ASTM D3774, D3775,D3776 method covers the measurement of the fabric AATCC 118	+/- 3%	
Oil Repellency	Ability of a fabric to resist staining by specified stains Oil Repellency	Grade 4	
Water Repellency: Spray Test	AATCC 22 measures the resistance of fabrics to wetting by water	Rating 100	
Flammability	California Technical Bulletin TB117	As specified in California Technical Bulletin 117	
UFAC Flammability	Interior fabric test method	Meet Class 1 Requirement	
Antifungal Test	ASTM G21	Observation (<10% of surface growth)	Passed
Outdoor Furniture Cushion/Pillow			
Foam Density Test, Indentation Force Deflection test, Compression Force Deflection Test	ASTM D3574 to characterize the properties of flexible polyurethane foams	Should comply standard requirement	Passed
Outdoor Furniture Filling material (Foam) of Cushion/Pillow			
Flammability	California Technical Bulletin 116 & 117 Sec 1 to 4	As specified in California Technical Bulletin 116 & 117 Sec. 1 to 4-2013	Passed

Product Testing & Results: Grills and Appliances

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Platinum Grill			
Product Safety Certification review and testing	Outdoor Cooking Gas Appliances ANSI Z21.58-2018/CSA 1.6-2018	Meet the testing requirements as per the CSA standard for certification	CSA Certified
Prop 65 Warning Labeling	CAL Prop65.	This product can expose you to chemicals including Carbon Monoxide, which is a by-product of combustion known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.	This Warning informs Californians exposure to chemicals that cause cancer, birth defects, or other reproductive harm.
Platinum Grill: Black Marking Paint (on the control panel)			
Lead, Cadmium, and Phthalates content	CAL Prop65 & CPSC	Lead content < 90ppm Cadmium < 300ppm Phthalates content <1000ppm	Pass
Platinum Grill: Control Knob - Plating Surface			
Lead, Cadmium content	CAL Prop65 & CPSC	Lead content <100ppm Cadmium < 300ppm	Pass
Platinum Grill: Cooking Grate & Rotisseries Kit			
Material composition (FDA)	FDA/GRAS Requirements	Meet the US FDA requirements for SS304 material	Pass
Platinum Grill: Handle Anchor / Control Knob -Plating Surface			
Salt Spray Test	ASTM B117 (Modified) (2% sodium chloride concentration for 48 hours)	No sign of corrosion	Pass
Platinum Grill Packaging			
Transit test (various Drop Test, and Vibration Tests)	As per ISTA 3B Packaging method	No physical or functional damage should be observed	Pass

Product Testing & Results: Grills and Appliances

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Performance Grill			
Product Safety Certification review and testing	Outdoor Cooking Gas Appliances ANSI Z21.58-2018/CSA 1.6-2018	Meet the testing requirements as per the CSA standard for certification	CSA Certified
Prop 65 Warning Labeling	CAL Prop65	This product can expose you to chemicals including Carbon Monoxide, which is a by-product of combustion known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov .	This Warning informs Californians exposure to chemicals that cause cancer, birth defects, or other reproductive harm.
Performance Grill: Black Marking Paint (on the control panel)			
Lead, Cadmium, and Phthalates content	CAL Prop65 & CPSC	Lead content < 90ppm Cadmium < 300ppm Phthalates content <1000ppm	Pass
Performance Grill: Control Knob - Plating Surface			
Lead, Cadmium content	CAL Prop65 & CPSC	Lead content <100ppm Cadmium < 300ppm	Pass
Performance Grill: Cooking Grate			
Material composition (FDA)	FDA/GRAS Requirements	Meet the US FDA requirements for SS304 material	Pass
Performance Grill: Handle Anchor / Control Knob - Plating Surface			
Salt Spray Test	ASTM B117 (Modified) (5% sodium chloride concentration for 48 hours)	No sign of corrosion	Pass
Performance Grill Packaging			
Transit test (various Drop Test, and Vibration Tests)	As per ISTA 3B Packaging test method	No physical or functional damage should be observed	Pass

Product Testing & Results: Grills and Appliances

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Platinum Pizza Oven			
Product Safety Certification review and testing	ANSI Z21.58-2018/CSA 1.6-2018 for the Built-in format, and ANSI Z21.89-2017/CSA 1.18-2017 for the Counter-top format	Meet the testing requirements as per the CSA standard for certification	CSA Certified
Prop 65 Warning Labeling	CAL Prop65.	This product can expose you to chemicals including Carbon Monoxide, which is a by-product of combustion known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov .	This Warning informs Californians exposure to chemicals that cause cancer, birth defects, or other reproductive harm.
Platinum Pizza Oven: Door Insulation Gasket			
Lead, Cadmium, Phthalates content	CAL Prop65 & CPSC	Lead < 100ppm Cadmium < 300ppm Phthalates <1000ppm	Pass
Platinum Pizza Oven: Power Plug Cable Grommet			
Lead, Cadmium, Phthalates content	CAL Prop65 & CPSC	Lead <100ppm Cadmium < 300ppm Phthalates <1000ppm	Pass
Platinum Pizza Oven: Black marking paint (on the control panel)			
Lead, Cadmium content	CAL Prop65	Lead <90ppm Cadmium < 300ppm	Pass
Platinum Pizza Oven: Leveling leg			
Lead, Cadmium content	CAL Prop65	Lead <100ppm Cadmium < 300ppm	Pass
Platinum Pizza Oven: Control Knob - Plating Surface			
Lead, Cadmium content	CAL Prop65 & CPSC	Lead <100ppm Cadmium < 300ppm	Pass

Product Testing & Results: Grills and Appliances

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Platinum Pizza Oven: Warming Tray rack, Firebox			
Metal Composition (FDA GRAS)	Per FDA standard requirements	Meet the US FDA requirements for SS304 material	Pass
Platinum Pizza Oven: Cordierite Pizza Stone			
Leachable lead and cadmium	Per FDA standard requirements	Lead < 3.0 mg/dm2 and Cadmium < 0.5 mg/dm2	Pass
Platinum Pizza Oven Packaging			
Transit test (various Drop Test, and Vibration Tests)	ISTA 3B	No physical or functional damage should be observed	Pass

Product Testing & Results: Grills and Appliances

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Undercounter Fridge 24 Inch Solid door and Glass Door			
Product Safety Certification review and testing	Commercial Refrigerators and Freezers per UL 471 and CSA C22.2#120 for Outdoor Use	Meet the testing requirements as per the CSA standard for certification	cETLus Certified
DOE - Energy Consumption and efficiency for US (Residential and Commercial Use)	§ 429.70 Methods for determining energy efficiency and energy use	Per 10 CFR Part 429, Energy consumption kWh on the EnergyGuide label for US	DOE Listed- EnergyGuide label for US
NRCan – Energy Consumption and efficiency for Canada (Residential and Commercial Use)	CAN/CSA-C300-15 per Energy Efficiency Regulations	Per Energy consumption kWh limit per product type listed in the Energy efficiency standard	NRCan Listed- EnerGuide label for Canada
Undercounter Fridge 24 Inch Solid door and Glass Door: Levelling Leg (Plastic part) and Door Gasket			
Lead, Cadmium, and Phthalates content	CAL Prop65 & CPSC	Lead < 100ppm Cadmium < 300ppm Phthalates <1000ppm	Pass
Undercounter Fridge 24 Inch Solid door and Glass Door: Levelling Leg (Plated Surface)			
Lead, Cadmium content	CAL Prop65 & CPSC	Lead <100ppm Cadmium < 300ppm	Pass
Salt Spray Test	ASTM B117 (Modified) (2% sodium chloride concentration for 24 hours & 48 hours)	No sign of corrosion	Pass
Undercounter Fridge 24 Inch Solid door and Glass Door Packaging			
Transit test (various Drop Test, and Vibration Tests)	Modified ISTA3B per NAP customized Packaging method	No physical or functional damage should be observed	Pass

Product Testing & Results: Platinum Griddle

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Platinum Griddle (33 in. and 40 in.)			
CSA Certification	ANSI Z21.58-2022 / CSA 1.6-2022 for Outdoor cooking gas appliances	CSA Certified Product	Pass
Distributed Load Test	Evenly distribute the load up to 1.5xCLC which is 37.5 lbs. on the griddle plate for 5 minutes. There shall be no loss of serviceability and no permanent deformation. Upon completion of the test.	The griddle plate can sustain the 1.5Xclaimed load capacity (CLC) of 25 lbs. of distributed load.	Pass
Equivalent Heat Distribution Test For Griddle Pate	Place the thermocouple probes at the different locations on the griddle plate and the outer body of the platinum griddle. After that, ignite the platinum griddle for 1 hour and record the temperature of each probe. After testing, the temperature should be even on griddle plate without any abnormalities in product or it's performance.	Griddle plate has even heat distribution without any abnormalities	Pass
Temperature Performance Test (Components)	Ignite both the burner for 60 min at high setting, after that turn off the burner and close the Lid immediately within 5 seconds. There should not be any visual changes, deformation, wrapping of the lid.	Best-in-class strength of griddle's components makes it work without melt, stop working or shall not show excess temperature	Pass
Water Leakage Test	Spray water to the seams of the firebox, and observe any water leaking out of fire box. Observe any grease leaking out of the fire box after cooking the meats	No grease will leak out of the grill	Pass
Cooking Test	Prepare the raw food and pre-heat the Platinum Griddle to the proper temperature before placing the food item on the griddle plate and cook the food until it is completely baked	The meat & veggies can all be cooked quickly and effectively in the Platinum Griddle.	Pass
ISTA Test	Safe & secure packaging	As per ISTA 3B	Pass
Regulatory Requirement For Chemical Content	Warning Label	N/A	Pass

Product Testing & Results: Platinum Griddle

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Platinum Griddle: Griddle Plate (33 in. and 40 in.)			
FDA Testing	Regulatory requirement	Tested as per FDA requirement for food content materials	Pass
Thermal Shock Stability Test	Ignite both the burner for 30 min at high setting, after that turn off the burner and immediately pour 250 ml water (15-25°C) on the griddle plate. There should not be any defect & bending of the plate.	Best-in-class thermal shock stability of griddle plate makes it resistance to deform/bend	Pass
Platinum Griddle: Griddle Lid (33 in. and 40 in.)			
Temperature Performance Test For Lid	Ignite both the burner for 60 min at high setting, after that turn off the burner and close the Lid immediately within 5 seconds. There should not be any visual changes, deformation, wrapping of the lid.	Best-in-class strength of griddle lid makes it resistance to deform/bend due to heat	Pass
Lid Stability Test	Keep the lid of the griddle in fully open position and start the blower placed 12 inches from the back surface of the griddle with a wind speed of 15 km/h for 10 minutes	High stability of lid makes it resistance to fall/close during the use	Pass
Platinum Griddle: Plastic Components & Metal Components			
Regulatory Requirement For Chemical Content	Chemical testing to comply with CPSC and CA Prop 65 requirements	Lead, Cadmium & Phthalate test as per CA Prop 65	Pass
Corrosion Resistance Test	Corrosion resistance	ASTM B117 (Mod. - 1% for 24 and 48 Hours)	Pass

Product Testing & Results: Perfect Crust Pizza Oven

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Perfect Crust Pizza Oven			
CSA Certification	CSA certified product	ANSI Z21.89-2017 / CSA 1.18-2017 for Outdoor cooking specialty gas appliances	Pass
Thermal Shock (Viewing Glass)	The viewing glass has enough strength to sustain the sudden change in temperature	After igniting the burner for 30 minutes spray the cold water on the glass for 1 minutes. Cold water temperature: 7-8°C	Pass
Temperature Performance Test	Pizza oven internal temperature reaches 460° F (237.7 °C) in 10 minutes without any abnormalities in product or it's performance.	Place the thermocouple probes at the different locations of the pizza stone and the outer body of the pizza oven. After that, ignite the pizza oven for 1 hour and record the temperature of each probe.	Pass
Push Test	The pizza oven is well stable, and a rubber pad doesn't leave any residue on the floor, e.g., stainless steel, solid wood, & marble.	Place the pizza oven on a different surface and apply the force at a different location from the front until the product tilts to 10° or starts sliding, whichever occurs first.	Pass
Wind Test	The design of the pizza oven is secure enough to sustain the different wind speeds of 5, 10 & 15 km/h without extinguishing the burners.	Place the pizza oven on a level surface and ignite all the burners at a high setting. After that, blow the wind at different speeds of 5, 10, & 15 km/h for 1 hour each with the help of the blower 10” away from the pizza oven.	Pass
Cooking Test	The chicken, vegetables, and pizza can all be cooked quickly and effectively in the performance pizza oven.	Prepare the raw food and pre-heat the pizza oven to the proper temperature before placing the food item inside and wait until it is completely baked/cooke	Pass
Regulatory Requirement For Chemical Content	Warning Label	N/A	Pass

Product Testing & Results: Perfect Crust Pizza Oven

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Perfect Crust Pizza Oven: Pizza Stone			
Food Contact Chemical Test	Food safe	as per US FDA & Cal pro 65	Pass
Distributed Load Test	The pizza stone can sustain the claimed load capacity (CLC) of 20 lbs. of distributed load.	Evenly distribute the load up to 1.5xCLC which is 30 lbs. on the pizza stone for 5 minutes.	Pass
Perfect Crust Pizza Oven: Coated Materials			
Corrosion Resistance Test	Corrosion resistance	ASTM B117 (Mod. - 1% for 24 and 48 Hours)	Pass
Adhesion Test	Durable coating	ASTM D3359 - 17 (Method - A / B)	Pass
Regulatory Requirement For Chemical Content	Warning Label	N/A	Pass

Product Testing & Results: Essential Outdoor Kitchen Series

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Essential Outdoor Kitchen: Cabinetry			
CSA Certification	CSA certified product	ANSI Z21.58-2022 / CSA 1.6-2022 for Outdoor cooking gas appliances	Pass
Equivalent Heat Distribution Test For Cooking Surface (Grates)	Cooking grates has even heat distribution without any abnormalities	Place the thermocouple probes at the different locations on the grates of the EOKC. After that, ignite the grill for 1 hour and record the temperature of each probe. After testing, the temperature should be even on cooking grates without any abnormalities in product or it's performance.	Pass
Temperature Performance Test For Grill Outer Components	Best-in-class strength makes it resistance to deform/bend due to heat	Place the thermocouple probes at the different locations on the outer components/parts of the EOKC. After that, ignite the grill for 1 hour and record the temperature of each probe. After testing, the components shall not melt, stop working, wrapping/visual deformation/changes or shall not show excess temperature.	Pass
Lid Stability Test	High stability of lid makes it resistance to fall/close during the use	Keep the lid of the grill in fully open position and start the blower placed 12 inches from the back surface of the griddle with a wind speed of 15 km/h for 10 minutes. After testing, the lid shall not fall/ close.	Pass
Water Leakage Test	No grease will leak out of the grill	Spray water to the seams of the firebox, and observe any water leaking out of fire box. Observe any grease leaking out of the fire box after cooking the meats	Pass
Cooking Test	The meat & veggies can all be cooked quickly and effectively in the Platinum Griddle.	Prepare the raw food and pre-heat the Platinum Griddle to the proper temperature before placing the food item on the griddle plate and cook the food until it is completely baked	Pass
Regulatory Requirement For Chemical Content	Warning Label	N/A	Pass
Regulatory Requirement For Chemical Content	Chemical testing to comply with CPSC and CA Prop 65 requirements	Lead, Cadmium & Phthalate test as per Cal prop 65	Pass
Coating Adhesion Test	Durable surface against scratches	ASTM D3359 -17 (Method -A / B)	Pass
Pencil Hardness Test	Durable surface against scratches	ASTM D3363-22	Pass
UV Exposure Test	UV resistance	UV Exposure Test-ASTM G154 -23 cycle -1	Pass
Corrosion Resistance	Corrosion Resistance	ASTM B117-19	Pass
Chemical Resistance (Stain Test)	Stain Resistance	ANSI / KCMA A161.1 -2017 Sec 9.4	Pass

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Effect of Heat and Cold	Weather Resistance	24 Hours at -20° C then 24 Hours at. 50° C & 95±5% R.H.	Pass
Anti Fungal (Mold & Mildew)	Mold and Mildew Resistance	ASTM G21	Pass
Distributed Load Test	Load Capacity	Claim Load Capacity Test	Pass
Bulk Propane Setup Test	Compatible with bulk propane setup	critical tests as per ANSI Z21.58-2022 / CSA 1.6-2022 for Outdoor cooking gas appliances	Pass
Essential Outdoor Kitchen: Sink			
cUPC	cUPC Certified by IAPMO	The cUPC certification ensures plumbing products, like sinks, meet Canadian safety, performance, and durability standards as per the Canadian Uniform Plumbing Code.	Pass
Essential Outdoor Kitchen: Faucet			
NSF61 Drinking Water System Components - Health Effects	Meets Kitchen Faucet Safety Standards for Canada and US	Comply with the requirements	Pass
NSF372 Lead Free Plumbing Products	Meets Kitchen Faucet Lead Content Standards for Canada and US	Comply with the requirements	Pass
California Flow Rate Test	Meets Flow Rate Requirements in California (California Appliance Efficiency Regulations [tested in accordance with 10 C.F.R. Section 430.23(s) (Appendix S to Subpart B of part 430))	TBD Must be <1.8 gpm @ 60 psi	Pass
US Department of Energy Flow Rate Test	Meets Flow Rate Requirements as per US Department of Energy (10 CFR Part 430 (Energy or Water Conservation Program for Consumer Products) and the Energy Policy and Conservation Act)	Must be <2.2 gpm @ 60 psi	Pass
Essential Outdoor Kitchen: Metal Parts			
Corrosion Resistance Test	Corrosion resistance	ASTM B117 (Mod. - 1% for 24 and 48 Hours)	Pass
Essential Outdoor Kitchen: Packaging			
ISTA 3B & ISTA 3L	Packaging test to ensure product reach customer without any damages & safely.	Drop test, Vibration test	Pass

Product Testing & Results: Dekton Countertops

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Dekton Countertops (All Sizes)			
Distributed Load Test On 48in Span	Apply distributed load up to 800lbs. gradually on the countertop. After removing the load, no permanent deflection and damage should be observed	The 64” top with a 48” span can sustain up to 550lbs distributed load on the countertop	Pass
Concentrated Load Test On 48in Span	Apply the concentrated load of 200 lbs. at the middle of 48” span for 1 hour and no permanent deflection and damage should be observed	The 64” Top with a 48” span can sustain the concentrated load of 200lbs.	Pass
Impact & Scratch Resistance	Good Impact and Scratch Resistance for daily kitchen usage	EN ISO 10545-5 : Dekton countertops are tested to ensure excellent resistance to accidental impacts, helping maintain structural integrity and surface appearance over time.	Pass
Extreme Temperature Resistance	Maintains Structural Integrity in Hot and Cold Conditions	ASTM C372 and EN ISO 10545-12 and ASTM C1026 : Dekton countertops are tested to ensure good resistance to extreme temperature for both indoor & outdoor condition, helping maintain structural integrity and surface appearance over time.	Pass
Moisture Expansion	Ensures Long-Lasting Stability in Moisture-Prone Environments	ASTM C370 : % dimension difference when exposed to humid or wet environments.	Pass
Breaking Strength	Strong & Durable Countertop Material	ASTM C648 : It measures the maximum load a countertop specimen can withstand before failure (breaking) when subjected to a concentrated load.	Pass
Resistance To Deep Abrasion	Good resistance to abrasion and wear under normal daily kitchen use conditions.	ASTM C1243 and ASTM C501 : This measures how much material is worn away when subjected to abrasive grinding action.	Pass

Product Testing & Results: Dekton Countertops

Rigorous product testing shown below is an important part of our engineering process.

Test Description	Test Specification and Standard	Passing Requirements	Test Result
Thermal Shock Resistance	Engineered to Withstand Rapid Temperature Fluctuations	EN ISO 10545-9 and ASTM C424 : Both EN ISO 10545-9 and ASTM C424 evaluate Thermal Shock Resistance, but what they actually measure and record is whether the material develops visible damage after repeated extreme temperature changes.	Pass
Stain And Chemical Resistance	Stain and Chemical Resistance	ASTM C1378	Pass
Water Absorption	Exceptional Water Resistance Enabled by Ultra-Low Porosity	ASTM C373 : % weight difference of dried specimen vs specimen after water immersion	Pass
UV resistance	Excellent Color Stability under Direct Sunlight	ISO 11341:2004 : Tested for 5000 hours of simulated daylight and humidity	Pass
Flammability test	A2 Classified for Very Limited Contribution to Fire	UNE EN ISO 1716:2011: “Reaction to fire tests for products - Determination of the gross heat of combustion (calorific value) (ISO 1716:2010)”. UNE-EN 13823:2012+A1:2016: “Reaction to fire tests for building products - Building products excluding floorings exposed to the thermal attack by a single burning item”	Pass
NSF Certified Dekton Material	Built with Dekton surfaces certified by NSF* for hygienic food contact applications (* for more information on NSF Certified colors, visit www.nsf.org	NSF/ANSI 51 - Food Equipment Materials	Pass
